

In the Claims:

1-2. (Canceled)

3. (Currently Amended) A method comprising:
receiving data corresponding to an image, the image including a depiction of text;
recognizing at least some of said depicted text;
~~storing said recognized text in a data repository~~; and
encoding a watermark in said image, said watermark serving to associate said
image with said data repository recognized text.

4. (Canceled)

5. (Previously Presented) The method of claim 3 in which said recognizing
includes recognizing by an automated OCR process.

6. (Withdrawn) In a method of building an index to a collection of web pages by
reference to text and meta tags found therein, an improvement comprising:

downloading an image from one of said web pages;
decoding a digital watermark from the downloaded image;
through use of said decoded digital watermark, obtaining text associated with said
downloaded image; and
augmenting the index in accordance with said obtained text.

7. (Withdrawn) The method of claim 6 in which the decoded digital watermark
includes a database reference, and the method includes using said reference to obtain
information from an associated database record.

8. (Currently Amended) A method of augmenting image data collected by a security monitoring camera, comprising:

analyzing a frame of image data from said security monitoring camera for text information depicted therein; **and**

~~storing the text information in a data repository;~~

digitally watermarking said image data;

wherein said digital watermark ~~indicates the location of the stored text information in said data repository~~ associates the image data with the text information.
